

cleanJet

Sustainable cleanliness

The high-speed way to cleaner laundry.

cleanJet - the small revolution for great washing results

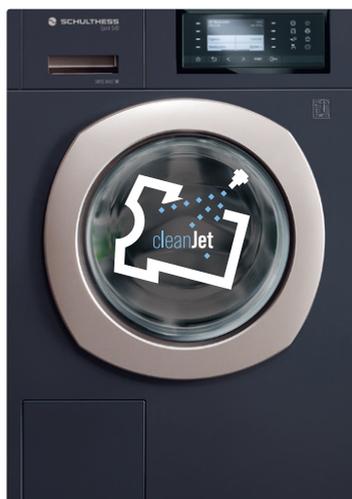

It's no coincidence that we have named our new technology cleanJet. An optimally coordinated programme sequence, consisting of a combination of rotations and programme pauses, ensures that voids are created between the laundry items. The water-detergent mixture is injected into these voids at high speed, exactly where it's needed. The result is a perfect wash effect that is achieved much more quickly and is even more efficient, as the detergent dissolves more rapidly due to cleanJet.

Allergy sufferers will be particularly pleased: The new technology rinses the laundry even more effectively, further reducing detergent residues on clothing. But everyone can consider themselves lucky: All Homecare models (Private households + Apartment blocks) will be equipped with cleanJet from 1 March 2021.

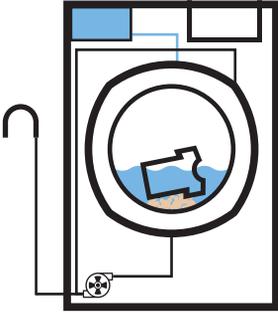

Faster, cleaner, more cost-effective.

Excellent design, outstanding functionality

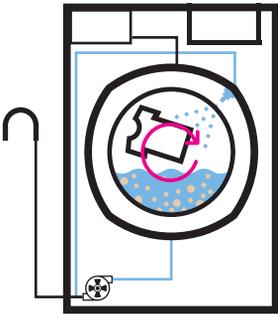

Easy on the eye: With their outstanding design, Schulthess washing machines already shine from the outside. But in the end, it's the inner values that matter. And here the intelligent washing programmes ensure that your laundry is washed extremely gently, super quickly and to a perfect level of cleanliness – even at low temperatures. For minimal water consumption and first-class energy efficiency. And so for real, sustainable cleanliness. Beautiful, isn't it?

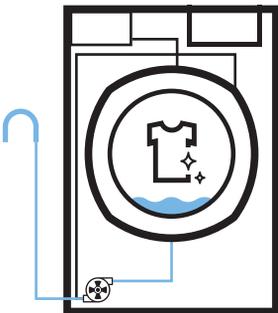

Smarter washing with intelligent technology.

The washing programme starts: The detergent compartment is rinsed with water and the drum flooded.

The water-detergent mixture is pumped from the bottom of the caustic tank and sprayed specifically onto the laundry. This makes the detergent dissolve better and ensures an optimal washing effect.

The laundry is evenly soaked and thus washed more rapidly and more cleanly. Once washing and spinning have ended, the perfectly clean laundry can be removed.

cleanJet – sustainable washing, turbocharged.

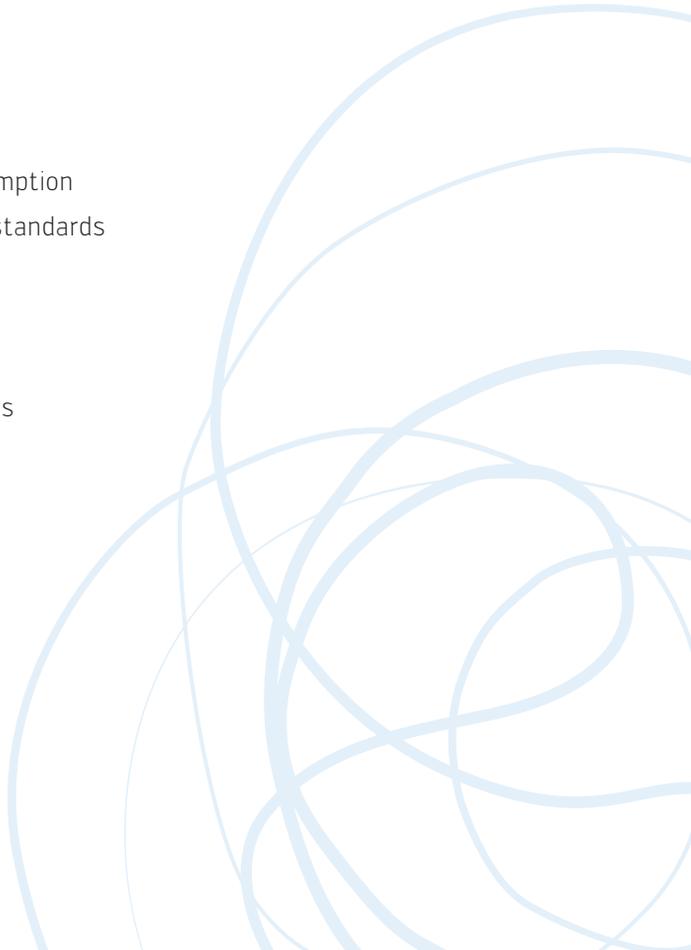

- Improved washing performance and cleaner laundry
- Faster dissolving of detergent
- Faster soaking

- Water conservation
- Lower detergent consumption
- Meeting latest energy standards

- Targets detergent stains
- Allergy-friendly

We advise you both quickly and professionally.

With our expertise in eco-friendly and efficient washing solutions we gladly assist you in finding the perfect appliance for your needs. Just give us a call or send us an email.
