

Detergent

FLOW fat killer

Neutral fat solvent with optical brightener

Product No

E522852

Properties

- high whiteness starting from 40°C
- special fat-dissolving formulation for every wash
- high pigment and dirt carrying capacity
- excellent emulsifying capacity
- gentle on colours and fabrics
- foam-regulated

Application

FLOW fat killer is suitable both for the pre-wash and as an additive (to the main wash) in the case of extreme soiling. Even at 40°C, FLOW fat killer already achieves good fat dissolution, although this improves significantly as the temperature rises.

Depending on the degree of soiling:
2–10 g/kg of laundry

Technical data

Density (20°C) 1.00 g/ml
pH value (conc.) 7.0–8.0
CSB (DIN ISO 15705) 476 mgO₂/ml

Notes

Storage:

FLOW fat killer is not sensitive to frost, but becomes viscous and can even solidify if stored below 0°C for a long period of time. However, the product can be used again after warming up without loss of quality (shake well beforehand). Keep containers tightly closed. The product can be stored for at least 24 months in the sealed original container.

For commercial use only. This leaflet is for non-binding information only. The information is based on our current knowledge and experience. The user is in any case obliged to carry out his/her own tests and trials to check the suitability of the products for his/her intended processes and purposes. The information in this data sheet does not constitute a guarantee for the quality and durability of the goods to be supplied by us. We reserve the right to make technical changes within the scope of what is reasonable. The relevant EU safety data sheet in the current version must also be observed.
